Project Title: Museum of Modern Art Website

This would work best as multiple pages. Most museum websites have a navigation bar at the top to click from page to page for sake of clarity and communication. However, unlike the existing Museum of Modern Art website, only one page would focus on the actual artwork.

1. Home Page/Introduction
2. History
3. Artwork Highlights
 - Main focus on better known paintings but also mention of additional departments (film, library, architecture and design)
4. Managing the Museum
 - Attendance, admission, finances, key people
5. Sources
 - Those listed on Wikipedia and Wikipedia itself
 - The current MoMA website
